

New for the Nook

Barnes and Noble is really making headway with their book reader. Today I just got a software update for my Nook. They made somethings easier like connecting to Wi-Fi sites and loading music. And they added a thing or two. The first was a section for Games. So far there are only two games, but I'm sure they will add more. I'm sure part of it will be a money maker for them too. I can see them charging for 'Game' apps. They said they did some changes to make the page turning quicker. All good right!

Then there is the big change. I can now access the internet on my Nook. I was able to read blog posts, check up on email and some other things you can do on the web. I don't think it is made to play movies or things like that, but it does handle basic text and graphics very well. I don't think I would ever use it for more than quick replies. The data entry is a bit rough for me. I did try to reply to a blog, but it said I was posting from a spam site, even when I was logged in as me. Hmm.

Big problem though, the Web seems to eat battery life. I guess I will need to keep my charging cord available at all times if I want to scan the web often.

I just hope the ability to store my books in files, or give them tags will be available soon.
