

# Watchout for falling rocks

In the State of Utah, a rock arch in [Utah's Arches National Park](#) collapsed. Now I never have been to the state of Utah, and therefore have never been to this park. From pictures I have seen, it looks like a place I would like to visit. The pictures made me think of one of my favorite places that I've ever been to is in South East Ohio. A wonderful State Park area called [Hocking Hills](#). As a family we've had many great vacations there.

The story of the collapsing arch, made me remember the rock falls around the hiking trails of Hocking Hills. Going back time after time, you can see how the rock falls change the area. Trails are closed or rerouted and each trip can be different than the last.

The thing is that even with this arch fall, people didn't see it happen. With all the times at Hocking, I never saw a rock fall but have seen the results. I know people do occasionally see them, most of the time they fall unnoticed. I would like to talk to someone who saw a large rock fall.

One thing I just thought about was the fact that these rock falls occur quite often, but people will go right to the edge of the cliffs, even if they don't know what is or what isn't under them. Oh well, I guess if they haven't seen a rock fall, they don't know the danger they could be in. And I guess I never saw anyone fall off either.
