

Finally cleaned up another problem.

I've been complaining that my laptop is broken for some time now, but I never used that opportunity to fix my Power Box. I've had stuff to do on it for a couple of years now, but it just wouldn't boot up properly after I installed a new hard drive. I thought I knew what the problem was, but I never undertook the job of actually looking at it. So today I did.

Yes, the problem was exactly what I thought it was. It was trying to boot from the old disk drive. Unfortunately, this drive no longer had any operating system on it. It was still formatted as a bootable drive, but there was nothing to boot to. Quick spin through the bios, and that drive is no longer on the boot list. YEAH.

Now I just have to find all of the stuff I needed to do and finish it up. Yes, there may be a Godspell video in there somewhere. I guess I'll have to stop blogging after my software updates from more than 1 year of inactivity.

More work for me. I'm glad I took a break from theater for a while... ☐
