

# semi high speed

I'm moving up in the world. I now have semi high speed internet. I have a internet connection through my cell phone company, and it works!!!

For those who don't know, I live out in the middle of no where. I have no chance of getting cable, DSL, Fiber Optic, and even our local wireless. I could get satellite, but I would need to cut down a few trees, since I live in the woods and have no clear southern skies. I've been using a dial-up connection for years. Now have speeds at least 4 times as fast, sometimes more. I think if I get a good external antenna for the receiver, I will approach DSL speeds most of the time. I am just impressed by this.

I'm going to be checking some things out over the next few days, and if all works out, I will be getting rid of my dial-up account, or at least going back to the free 10 hour deal with ads. If I get rid of the dial-up completely, I may get rid of my land phone at the same time. That would more than pay for my high speed connection. Cool stuff, no install fee, the hardware was free with rebates, and I didn't have to cut any trees.
