

# No sleeping in for me

Whenever I have had a subbing day this year it has almost always been a result of getting up early and hitting the web. Last night I was able to secure a job in 6th grade a little after 10 which didn't have a start time until almost 8:30, meaning I could sleep in, at least a little bit. Okay, knowing about the snow meant I should be up about 20 minutes earlier to get shoveling out of the way. Still, I could get up about an hour later than usual. Of course you know something was bound to happen, and happen it did at about 4AM. That's when I was jarred out of my sleep by what I thought then was the neighbors slamming the door. It took me about a half hour to get back to sleep. I was worried because it didn't *sound* like a door slamming, but what else could it be. Well, eventually I did get up at about 6:45 and didn't worry about it all day. Unfortunately it wasn't quite early enough as there was more snow than I would have hoped waiting to be shoveled, making me a little bit late. At least I still arrived before the kids.

Yesterday I subbed for music at one of hometown district's middle schools- I actually got a call for it about five minutes before the alarm was set to go off. Very uneventful. We watched videos in all classes. At least I got to see [Blue Man Group](#), a group I had never heard before though I of course knew about them. Other class videos included [Stomp](#) and [The Wizard of Oz](#). Today I was excited because I was subbing in an elementary school, and what that usually means is getting to teach instead of just babysit. Well, not so much. The plans didn't include videos, but they did include a test, lots of reading and working on their own, and skit performances for social studies, in which they are studying Greek Mythology- a topic I really enjoyed myself when I was in 6th grade. Well, there was a spelling game too, and at least that was interactive. I also worked in a short math review not on the

plans before they started working on their assignment, and at least one other subject, vocabulary, was more interactive as well. Additionally, I worked in some word puzzles which I like to do in elementary classes. Definitely a more productive day for me than yesterday, overall.

So back to what woke me up. On one of the forums I read someone who I know lives around here made a post humorously telling California to keep the earthquakes to themselves. Say what? I read his post then had to go to my newspaper website to see just what he was talking about. Sure enough, there was a 3.5 magnitude earthquake a short distance from us. An earthquake. In Illinois. At 3:59AM. That's right, not a slamming door. Well, I guess if our tornadoes can be exported to other areas, I shouldn't be surprised when earthquakes are imported to our relatively-geologically-stable part of the country. Here's a link to the story (click the title), and a short excerpt:

## [Small earthquake wakes up northern Illinois](#)

*To some, it sounded like a train derailling, a snowplow taking out a car, a plane crash, a sonic boom.*

*To dogs, it was clearly something to panic about.*

*But the U.S. Geological Survey said what woke people well before dawn Wednesday was a mild, 3.8 magnitude earthquake whose epicenter was about three miles beneath a farm field a short distance south of Pingree Grove, near Route 20 and Switzer Road in western Kane County.*

*It started rumbling at 3:59 a.m. Wednesday and lasted just seven seconds.*

# Shaken Gang Syndrome

I am a current events junkie, so of course I've been following the recent story of the earthquake in southern Illinois. This earthquake was pretty strong; so strong, that tremors were felt as far away as large cities like Chicago, Indianapolis, and even Atlanta, Georgia.

Another recent headline in the news lately is the rash of gun violence in the city of Chicago. Seems the previous weekend saw 36 people shot in the city, 9 of them fatally. [Click here for that story.](#) Since they're saying that the midwest basically has not stopped shaking since the the earthquake last Friday, let me offer up a possible explanation for this phenomena: Shaken Gang Syndrome.

Sure, the gangs in Los Angeles can handle earthquakes without batting an eye, but it's not something that people in the midwest have had to adjust to. Maybe the instability of the earth's crust contributes to people feeling emotionally unstable, and this is illustrated with rising violence and civil unrest.

All jokes aside, let's hope this weekend's skyrocketing violent crime rate was an isolated incident in Chicago. The Chicago PD would like you to note that for the month of March, the violent crime rate was down by a whopping 1% compared to March 2007, so that is promising news!
