

# The Return Of Captain E0

This one is for fellow Disney fanatics – I just read an article about the return to Disneyland of the 17-minute Michael Jackson 3D video, [Captain E0](#). I never got to see Captain E0; my first time to Disney World was in 1992, and the attraction was either broken down during that visit or we just weren't interested in seeing it; I don't remember. By the time I grew up, started my family and began our traditional Disney World vacations, Captain E0 was long gone and replaced by the 3D interactive attraction Honey, I Shrunk the Audience.

Captain E0 replaced Honey, I Shrunk the Audience at Disneyland in Anaheim, California and opened today. The futuristic short film stars Michael Jackson and Anjelica Huston; it cost about \$30 million to make and also boasts the creative team of director Francis Ford Copolla and executive producer George Lucas. When it was shown at the Disney theme parks in the 80's and 90's, it was the most expensive film ever made (costing \$1.76 million **per minute!**). As of its opening today at 10am, there were many fans lined up to see it. No word on whether Captain E0 will return to Epcot in Disney World, Orlando Florida, but if it does, I might like to check it out, despite how much I will miss the always fun Honey, I Shrunk the Audience.

## A long time ago in a galaxy

# far far way

Saw the latest addition to the Star Wars Saga yesterday with my family. Interesting movie, but I'm not sure it did much to fill in the story for me.

As a stand alone movie, without any Star Wars background, I don't think this movie would even be in the theaters. The animation and story line were direct to DVD quality, or maybe in line with some of the offerings on Cable. Not what I would consider for a theatrical release.

That being said, this was a Star Wars movie. And of course another story in the life of the Skywalker family. Supposedly the time line for this is sometime between Attack of the Clones and Revenge of the Sith (Star Wars II and III). In that I was hoping it would expand the story a bit. I was disappointed in that.

Good points, well the battle scenes (and there were a lot of them) were interesting to watch, and the interaction of various members of the Droid army were very funny. The voices behind Count Dooku (Christopher Lee), Mace Windu (Samuel L. Jackson) and C3P0 (Anthony Daniels) were well done, especially since they were all in the other movies as the same characters. The other voice work was ok, but the main characters lacked some zing. Maybe this is my "the original 3 shows were better" mentality, but this show needed work.

Is it worth going to see? Cheap theater, cheap seats (two for one day, or bring your own bag day) sure, but if you're not a Star Wars fan, save you're money – wait for the rental.

# Indy Is Not Going To The Dogs

Well... at least Mr. Lucas has done something right. He recently acknowledged the fact that any future adventures of Indiana Jones **MUST** have Harrison Ford in the titular role. There will be no passing of the fedora and whip to his son "Mutt" Williams in the near future. The final scene of *Indiana Jones and the Kingdom of the Crystal Skull* alluded to that when **THE** hat was seen blowing into the church and Dr. Jones snatched it away from the young upstart. Of course I would say that as much bad press as Shia LaBoeuf has been getting as of late, he may find it difficult to find work if he continues on what seems to be a downward spiral.

In this [article](#), Mr. Lucas also speculates on the future of his other cinematic series of films including the opening of *Star Wars: Clone Wars* this weekend.

## Johnny Be Good

There are several things that go into the making of any movie: acting, directing, writing, set design, etc. I feel that some of the best movies are defined not only visually but aurally. There is one man who in the past 40+ years has become the master of film scores. He has composed the music for at least 6 of the top box office movies of all time and has become the right hand man of Steven Spielberg and George Lucas. In every movie he has ever composed the music for, John Williams creates several characters (or at least enhances those on

stage) along with the London Symphony Orchestra. Where would Darth Vader be without the ominous, thunderous "Imperial March?" Elliot and E.T. could not have flown on the bicycle without the wondrous theme. Christopher Reeve would not be nearly as super without the triumphant strains of the "Superman March." Bruce the Shark would have been a guppy without the haunting motif from *Jaws*. I do not believe there has been a recent film directed by Steven Spielberg that Maestro Williams has not composed the score to. Whether it be blockbusters like *Jurassic Park* or more serious, thought-provoking movies like *Schindler's List*, Mr. Williams has been the musical Force (pun intended) behind all of them. Several DVDs produced have the option of viewing the film with music only... just see how little empty space there is without the dialog. If it is a John Williams scored film there would not be much. If there is one thing I am a guilty collector of it is the breathtaking, awe inspiring beauty of the music of John Williams. I challenge anyone to name any movie that he has composed the music for that would be better without it. I anxiously await not only the crack of Indiana Jones' whip but also the majesty that is the opening bars of the "Raiders March."

## **In The Beginning... .**

There seems to be a fascination with franchise re-boots in movies today. If memory serves, one of the first was George Lucas' idea of deciding to tell the back story of Darth Vader. While the idea of *Star Wars* Episodes 1-3 seemed good in theory, it failed in many respects.

The plot of the trilogy had more to do with political mumbo-jumbo than actual lightsaber and space battles. It took three movies to explain how a Republic failed and became the Empire of the original *Star Wars* trilogy. Anakin Skywalker's transformation into Darth Vader almost seems like a secondary plot. And don't even get me started on the ridiculous concept of "midichlorians."

The acting seems stuffy in Episodes 1-3. Hayden Christensen's acting style is so wooden and forced that the audience really does not care about Anakin Skywalker. The dialogue makes it sound as if the audience is watching a Shakespearean play instead of the fun, swashbuckling atmosphere of episodes 4-6.

However, there are good moments in the second trilogy. [\*The Phantom Menace\*](#) includes a lightsaber duel between Obi-Wan Kenobi, his mentor Qui-Gon Jinn, and the evil Sith Lord Darth Maul. By the time [\*Attack of the Clones\*](#) came about, enough technology had been created to allow Yoda to become more than a mere puppet and engage in his own lightsaber fight. Finally, [\*Revenge of the Sith\*](#) features the climactic battle between Obi-Wan Kenobi and Anakin Skywalker.

On a side note, the title *Revenge of the Sith* is a nod to the title which Episode 6 was to be. *Revenge of the Jedi* was to be the title of the final movie. At the last minute after posters, advertisements, and merchandise had already been created, George Lucas decided that a Jedi does not seek revenge. Therefore, the title was changed to [\*Return of the Jedi\*](#). *Star Wars* collectors must have a field day looking for and selling these rare pieces of memorabilia on [ebay](#) and at conventions.

While both trilogies are among the most popular movies in history, the redemption of Anakin Skywalker as seen in episodes 4-6 are much more imaginative than the newer films. However, if you are a *Star Wars* purist and want to know how and why Darth Vader came to be then you should watch the newer

films which are the first in the timeline of the series...

## Really Quacks Me Up

Well, I'm kinda thinking my blog will be a hodgepodge (?) of just about everything I enjoy. I enjoy a good movie (or even some bad movies). Speaking of bad movies, the guy who created Howard the Duck, Steve Gerber, just passed away. Apparently, the comic book from the 70s was a cult hit. Somehow, Mr. George Lucas came up with the brilliant idea that it would make a box-office hit. The movie came out in 1986. The only relatively recognizable actor in it is Lea Thompson (of Back to the Future fame). I believe ol' George was once again attempting to create a new money making franchise along with the then in-limbo Star Wars saga and the popular Indiana Jones series. Needless to say, Howard the Duck was a miserable flop. It is one of those movies which may be enjoyable with a group of friends who just want to sit around, waste a hour and a half, and laugh at the absurdity. It would also be a great way to relive the culture of the mid-1980s. Big hair, bubble gum pop music, and forgotten actors of the day (whatever became of Lea Thompson?). But, if you want to have a good laugh check out Howard the Duck just to see the duck from outer space rock and roll with Lea Thompson. I think the best part of the movie is the theme song and that is not that great. It sounds like a great movie to watch with your band of theatre chums. Thank you Bryan Times for publishing an article about an otherwise forgettable comic book writer who probably will go down in history for the creation of one of the biggest "Turkeys" or should I say "Ducks" in movie history. I also found out via [IMDB.com](http://IMDB.com) that Tim Robbins (For comic relief?) also was in it and that no less than 8 actors are credited with playing the

title role. Also, may be a good movie for children of all ages to enjoy.
