

# What's The Use Of Wonder-ing

Well... it looks like one contender for next fall's NBC lineup is now defunct. The network passed on the new adventures of the Amazonian Princess after a disastrous screening of the pilot. I wonder if it will ever be shown... probably over the internet in the coming days. I remember a few years ago, the creators of another superhero inspired series attempted to bring a live-action Aquaman series to the small screen. It too failed but the pilot was shown on outlets like itunes.

Perhaps, the shows creators will continue to shop it around. Either way, at least we will not have to be disappointed by another heartless update of another television series gone by.

I dunno if it would have been the comic book geek in me or the nostalgic value of the series. Of course, the updated Bionic Woman travesty did nothing to endear itself to anyone and the Knight Rider update lasted about as long. Maybe it was the new [costume](#)? Personally, I prefer the original Lynda Carter version ☐
